

## **The IT Department Inc. Forms Unique Partnership with Willis Collegeto Help Students Get Jobs and Work Placements**

Willis College and The IT Department have formed a partnership to benefit the students of Willis College and each other. The IT Department is always looking for new talent as it grows and Willis graduates are seeking jobs and co-ops. In the past, The IT Department has hired Willis grads and Willis has been very pleased with the co-op placements as they often led to jobs. Students have reported back to us that they enjoy working there.

The IT Department is pleased to announce that they will take Willis grads from each graduating class to do co-ops with the possibility they may lead to jobs. Willis College is proud to declare The IT Department as a premier co-op location for its students.

Willis and ITD will also work together on a number of other joint efforts.
